PROFESSIONAL SUMMARY

Senior Game Engineer specializing in developer tooling and pipelines — building the engines, editors, and automation other developers rely on. ~9 years across PC, VR, and mobile (Meta Quest, Switch), with a track record of multiplying team productivity: CI/CD pipelines adopted by 5 projects, reusable engine tooling, and editor tools that measurably cut build and debug time. Strong in C# and Unity3D (C++ knowledgeable), with a passion for mentoring and elevating team workflow.

WORK EXPERIENCE

Skeleton Crew Studio , <i>Senior Game Engineer</i>	02/2021 – Present Kyoto, Japan
- Architected scalable gameplay systems and custom tools across multiple shipped titles, and resolved critical performance/stability bottlenecks on constrained platforms (Quest, Switch). - Designed and deployed CI/CD build pipelines adopted by 5 projects, cutting build-and-test time by ~70% — plus in-editor build-trigger tools that launch builds straight from Unity. - Built reusable engine and editor tooling — a Unity visual-novel engine (2 projects) and a node-based Yarn Spinner editor that cut debugging/testing time by ~50% (see Projects). - Founded an internal learning center consolidating research and findings, enabling knowledge-sharing across all teams. - Mentored junior developers, fostering a collaborative, team-focused culture.	

EARLIER EXPERIENCE (2016–2021)

Earlier game/tools roles across Egyptian studios — a consistent through-line of building 3D apps, games and developer tools.

FunRock , <i>Game Engineer</i>	09/2020 – 02/2021 Alexandria, Egypt
Augmentoria , <i>Game Engineer</i>	06/2019 – 04/2020 Cairo, Egypt
Raskulls Game Studio , <i>Gameplay Programmer</i>	07/2018 – 04/2019 Cairo, Egypt
3DScales , <i>Software Engineer</i> · built the Cross Section Engine, a browser 3D slicing tool (live demo)	10/2016 – 04/2017 Tanta, Egypt

SKILLS

Languages: C# (Proficient), C++ (Knowledgeable)	Engines: Unity3D (Proficient), Unreal Engine (Familiar)
Technologies: Photon, Virtual Reality, Yarn Spinner, CI/CD	Platforms: PC, Meta VR/Quest, Switch
Core Concepts: Game Engine Architecture, Computer Graphics, 3D Math	Practices: Editor & Pipeline Tooling, Build Automation, Performance Optimization, Mentoring

PROJECTS

UI Studio , <i>Senior Game Engineer</i>	Internal — Skeleton Crew Studio
Standalone Unity package — editor tool + runtime navigation for authoring uGUI screens and routing between them. Adopted by 3 projects; stands up a working game flow in a day.	
Visual Novel Engine & Node Editor , <i>Senior Game Engineer</i>	Internal — Skeleton Crew Studio
Reusable Unity visual-novel engine (2 projects) + a node-based editor to author, visualize, and debug Yarn Spinner flow — cut debugging/testing time ~50%.	
Fantasketch ↗, <i>Senior Game Engineer</i>	
A puzzle-action game where the characters you draw come to life and move — control your creation and guide it to the goal. Available on Steam.	
TwinSoul ↗, <i>Senior Game Engineer</i>	
Upcoming music-action game set in mythological Japan. Demo available on Steam.	
Death Game Hotel ↗, <i>Senior Game Engineer</i>	
An intense VR strategy battle, available on Meta Quest and Steam.	
Autoliv ↗, <i>Game Engineer</i>	
An interactive product-visualization experience for Autoliv, the world's largest automotive safety supplier.	

EDUCATION

Information Technology Institute (ITI) <i>9-Month Professional Diploma — Game Development Track</i>	10/2017 – 07/2018 Cairo, Egypt
Tanta University — Faculty of Engineering <i>B.Sc. in Computer Science and Automated Control</i>	10/2009 – 07/2016 Tanta, Egypt

LANGUAGES

Arabic <i>Native</i>	English <i>Professional</i>	Japanese <i>Conversational — strong listening, active in daily meetings</i>
